

Attack Simulation Services

We simulate attacks that quantify your security effectiveness and ensure that your controls are working as expected.

We Test

External Networks

Internal Networks

Data Exfiltration

Your Testing Benefits

Defensive Team Testing Effectiveness

Verify the effectiveness of your monitoring and incident response processes when facing a real world, persistent, sophisticated attack.

Prove Security Controls

Demonstrate the effectiveness of security controls so you can rely on your current security program.

Pinpoint Issues

This testing will show you of the vulnerability issue are tooling, training or misconfigurations.

Assess Your Defenses

Assess the maturity of the organization's ability to detect and respond to real-world cyber attacks.

It's All About The Deliverable

- ✓ Details on how each finding was identified and confirmed
- ✓ Detailed recommendations of additional detection strategies
- ✓ Effective remediation recommendations
- ✓ Identifying the effective controls that prevent attacks
- ✓ A full narrative of the engagement
- ✓ Severity rankings

We also provide **Blue Team Workshops** where our testers work with your team to improve their defensive skills and capabilities.
